- + Live credit check for instant booking
- + Environmentally friendly railroad transportation
- + Full-coverage network

box2rail – Click & Rail.

The fast & easy way to book rail transports with absolute cost transparency – **that's what box2rail stands for.**

box2rail is an online booking platform for containerized transports that is geared specifically to the needs of small and medium-sized business enterprises. All it takes is a few clicks to organize **container bookings** from “port to door” on rail – the **reliable, fast and environmentally friendly** option from the **German** seaports straight to the final consignee in the hinterland and vice versa. The capacity **display** for **rail and truck** provides an **overview** of the capacities of the **entire transport chain.**

It makes no difference whether you wish to ship one container, two or more – **to us, every single one matters.**

Your transports benefit from our complete commitment and expertise.

Whether your container is headed for Germany, Austria or Switzerland, we make sure it reaches its destination quickly and reliably.

Container booking has never been this easy – try it out and see for yourself.

Click & Rail at www.box2rail.com

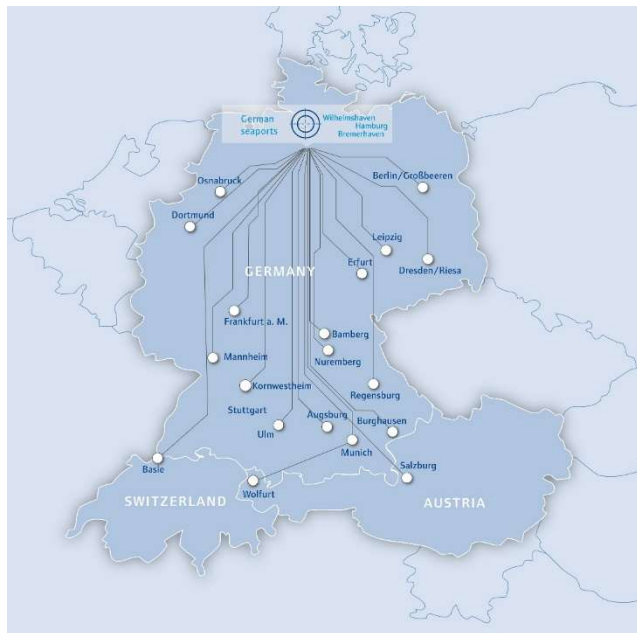

Strong network

box2rail benefits from the most comprehensive railroad network for seaport hinterland transportation in Europe – the **AlbatrosExpress** operated by TFG Transfracht, the market leader.

The full-coverage network links up more than **15,000 places** in Germany, Austria and Switzerland with the **German seaports** Hamburg, Bremerhaven, Wilhelmshaven – and it does so 260 times a week.

The AlbatrosExpress stands for frequent departures, fixed timetables, short transport times and comprehensive quality management.

+ AlbatrosExpress network

+ The benefits at a glance

- + 3 ports – Hamburg / Bremerhaven / Wilhelmshaven
- + 3 countries – D/A/CH
- + Full-coverage AlbatrosExpress network
- + Connections to more than 15,000 places in D/A/CH
- + 19 terminals
- + Frequent departures & fixed timetables
- + Comprehensive quality management

Green Logistics

Did you know that a **freight train** emits around **80% less carbon dioxide** than a **truck**?

Sustainable resource management has become a central element in our lives.

In terms of Green Logistics, box2rail is a prime argument for railroad transportation, because every single container that switches from road to rail means protection for the environment. **Your box counts!**

At TFG, a container covers **Ø 600 km** of the main haul of the journey **on rail** and is carried by truck only Ø 27 km for the “last mile”.

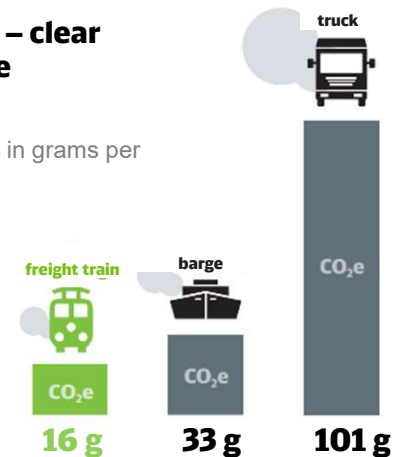

What’s more, we also promote climate protection by using low-emission, quieter and energy-efficient vehicles – in other words, sustainability up to the last mile.

+ Rail freight transport – clear carbon footprint edge

Freight rail:

Greenhouse gas emissions in grams per tonne and kilometre (tkm)

Deutsche Bahn AG | December 2023
 - CO₂e: Sum of the greenhouse gases carbon dioxide, methane and nitrous oxide
 - Sources: UBA (TREM0D 6.42, 2023).
