

AlbatrosExpress WEST

» Rotterdam and Antwerp: flexible and reliable connections – every single day

Our AlbatrosExpress West connects the most important container terminals for the maritime sector in Rotterdam and Antwerp with the economic centers of Germany, Austria and Italy - on a daily basis. For even more transports by climate-friendly rail.

» The benefits for you at a glance

Daily connections: between the western ports and Europe's economic centers.

Flexible and high-frequency connections: through a central hub in Neuss.

Short transit times, set timetables, flexible production.

Individually coordinated **port-to-door deliveries.**

Scalable train production: for flexibly increasing volumes.

Climate-friendly transport: environmentally friendly rail transport reduces CO₂ emissions by 80% compared to truck transport. **TFGeco train** also allows for 100% CO₂-free rail transport using renewable energy.
